WT 11-65: In the Matter of applications of AT&T Inc. and Deutsche Telekom AG
for consent to assign or Transfer Control of licenses and Authorizations

Dear Chairman Genachowski and Commissioners:

Sonoma Community Corporation of Sonoma County mission is to strengthen our local communities through educational avenues in the technology fields. We are able to do this through a variety of ways including free trainings class such as a 4 week Basic Computer training teaching them from basic hardware to internet usage, and Multi-Media Classes. In doing so we help our community access items or opportunities that they would under normal circumstances not has access to; thereby giving them a better chance of improving their lives and income which in turn improves the quality of life in Sonoma County.

Since our establishment in 2010, we have seen the needs of our community change and our organization and donors have evolved with it. It is because of this that we know first-hand the need for better access to technology across all of our cultures.

If this merger is approved which we support, AT&T will spend billions of dollars to deploy this advanced network throughout California and across the nation. As President Obama has said, all Americans deserve access to the benefits made possible by high-speed Internet services. This includes access to education, healthcare and entertainment. We support the President's goals for this connected future, as contained in both his own statements and the Federal Communications Commission's National Broadband plan.

The FCC also plays a role in delivering these advances to our community. We hope that the FCC will take our comments into consideration and do nothing that would prevent the merger approval process from moving in an appropriate and prompt manner.

Sincerely,

Juan M. Hernandez

President Sonoma Community Corporation 501(c)3
